Summary

Master’s graduate in Computer Science with a focus on Machine Learning and a multidisciplinary background. Enjoy AI and problem-solving, I seek roles in developing ML solutions and transforming data into valuable insights.

Education

Mas- ter	Université de Lille , Computer Science - Machine Learning • Deep learning, reinforcement learning,	Lille, France 2024 – 2026
Ma- chine	• Data analysis, • Computer vision and NLP.	
Learn- ing		
Bach- elor	Université Grenoble Alpes , Maths and Informatic applied to Human and Social Sciences (Cognitive Science) • Statistics,	Grenoble, France 2022 – 2024
(Li- cence)	• Data science, databases,	
MI- ASHS	• Human cognitive models.	
Prepar- atory	lycée Berthollet , Economics • Mathematics, computer science,	Annecy, France 2020 – 2022
class	• Geopolitics, humanities and languages.	
(CPGE		
ECS)		

Experience

CHU Lille, LIIFE team , AI Research Intern, End-of-studies internship applied to MRI scan harmonization using diffusion models. • Conducted research on image generation algorithms for MRI scan harmonization, • Designed, developed and trained diffusion-based deep learning models using PyTorch, • Improved data consistency across imaging datasets.	Lille, france Mar 2026 – Aug 2026 6 months
ATOS-EVIDEN , Data Management Intern 160-hour work-study internship in Data Management applied to HPC. • Automatic extraction of features from I/O time series using tsfresh (Python), • Optimized model performance and ensured data quality, • Clustering of time series to support Data Management in an HPC context.	Grenoble, France Jan 2024 – May 2024 5 months
Laboratoire Jean Kuntzmann (LJK) , Mathematics Research Intern 160-hour work-study internship in mathematical research focused on developing AI loss functions. • Literature review on tree comparison metrics for the SHERBET ANR project, • Implemented and benchmarked metrics in Python.	Grenoble, France Oct 2023 – Jan 2024 4 months
Research Laboratory in Linguistics and Language Teaching (LIDILEM) , Research Intern Licence Internship to build a database system for researchers. • Designed and implemented a relational database prototype. • Developed an interface for data manipulation.	Grenoble, France May 2023 – June 2023 2 months

Freelance Digital Environment Designer, Self-Employed

Designed 3D environments and organized Minecraft online events for companies' promotions.

Fully remote setting

2017 – 2024

7 years

- Designed and developed interactive 3D environments and custom maps for competitive Minecraft online events.
- Managed a five-member creative team in a fully remote setting.
- Liaised with clients to define and finalize project specifications.
- Set up and configured turnkey servers for seamless event execution.

Volunteer

Université Grenoble Alpes, Mathematics and Computer science tutor (Bachelor level)

Grenoble, France

Provided tutoring to Bachelor 2 students in mathematics and computer science.

2023 – 2024

- Mathematics tutoring in probability, linear algebra, and statistics,
- Code review in Java for computer science projects,
