SUMMARY

Master's graduate in Computer Science with a focus on Machine Learning and a multidisciplinary background. Enjoy AI and problem-solving, I seek roles in developing ML solutions and transforming data into valuable insights.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Java, R

Machine Learning: PyTorch, MLflow, Ray, SpaCy, Scikit-learn

Languages: English C1 (TOEIC), German

Other skills: Document research, Teamwork, Communication

EDUCATION

Master in Computer Science - Machine Learning

Deep learning, reinforcement learning, data analysis, computer vision and NLP.

Université Lille 1

2024-2026

Bachelor 2-3 MIAHS cognitive science track

Statistics, data science, databases, human cognitive models.

Université Grenoble Alpes

2022-2024

Preparatory class (CPGE ECS)

Mathematics, Computer Science, Geopolitics, Humanities and Languages.

Lycée Berthollet - Annecy

2020-2022

EXPERIENCE

AI Research Intern

LIIFE - CHU Lille

March - August 2026

Lille

- Conducted research on image generation algorithms for MRI scans harmonization,
- Designed, developed and trained diffusion-based deep learning models using PyTorch,
- Improved data consistency across imaging datasets.

Data Management Intern

ATOS-EVIDEN

January - May 2024 (160h)

Grenoble

- Automatic extraction of features from I/O time series using tsfresh (python),
- Optimized model performance and ensured data quality,
- Clustering of time series to support Data Management in HPC context.

Research Intern

Laboratoire Jean Kuntzmann (LJK)

October - January 2023-24 (160h)

Grenoble

- Implemented and benchmarked tree comparison metrics for the SHERBET ANR project.

PROJECTS

Clustering-of-Multivariate-Time-Series

Deep Clustering Project

January 2026 - February 2026

Python, tslearn, marimo

- Benchmarked various clustering techniques applied to multivariate time-series from GPS traces,
- Identified deep clustering techniques to represent connections between main subsequences in data.

Emotion Classification Pipeline

Autoencoders on facial images

May - June 2025

Python, PyTorch

- Implemented and trained a convolutional encoder (CNN) and a MLP to classify images.

ACTIVITIES INTERESTS

- Freelance Digital Environment Designer: Managed a five-member creative team in a fully remote setting.
- Sports: 10 years competitive swimming - Judo.
